

SECTION 4.03
TYPICAL CIRCUIT PATTERN

1. The preferred circuit is a Left Hand Circuit.
2. Some airfields may have specific requirements regarding circuit direction. This is especially so at fields where there are mixed Recreational, GA or Glider operations.
3. Aircraft shall not descend from above and onto the downwind (live) leg.
4. If specific requirements are not known pilots of recreational aircraft are required to contact the airfield for instructions prior to operating into the airfield.
